

Fibre Optic Patch Panel

24 PORT

Description

Hepda fiber patch panel is preloaded with adapters and a splice management kit for quick setup. Its quick-lock, pull-out tray extends fully for easy access during installation or maintenance. A removable top cover ensures convenient handling even after rack mounting, making it a reliable and user-friendly solution for fiber termination and management.

Compliance

- ✓ TIA/EIA 568.C,ISO/IEC 11801
- ✓ EN 50173, EN 297-1,IEC 60304, IEC 61754

Features

- Preloaded with required adapters and splice management kit
- Quick-lock, pull-out tray design (no plastic catches required)
- Tray extends fully for easy access
- Removable top cover for convenient handling and maintenance
- Designed for simplified installation and reliable fibre termination
- Suitable for rack-mounted applications in data centres, telecom, and industrial environments
